Subject:	RE: tree root effect on slope

Hi Robert,
We discussed your issue with the Coastal Commission yesterday and as we continue to consider your issues and requests, what would be most helpful would be a geology report for your property. If you could provide this that would help us all better assess the best option for moving forward.

Thank you,

Jill A. Martin

Subject: Fwd: tree root effect on slope

Jill/So
Here is the Coast Geotechnical study which was done a few years ago, which I mentioned in my presentation to the City Council this week. It clearly states that the trees are integral to the maintenance of the stability of the soil
I have discussed this with Elias Sassoon, and he supports maintaining the trees
Thanks
Robert Geraci
